

**EUSALP** EU STRATEGY FOR THE ALPINE REGION

[www.alpine-region.eu](http://www.alpine-region.eu)

# Embedding the EU strategy for the alpine macroregion in 2012-2027 programmes: how to do it?

AG9 activities and priorities,  
Bruxelles, 19-20 february 2020

**Etienne Viénot**

Action Group 9

**Auvergne  
Rhône-Alpes**  
Énergie Environnement

80 million people, 7 countries, 48 regions,  
mountains and plains addressing together  
common challenges and opportunities

## 3 activities developed by AG9

**Energy survey:** Reliable energy data are the basis for decision-makers to define, to implement and to monitor the effectiveness of energy policies.

*Financed by Alpgov2*

**Annual EUSALP energy conference:** experts from the Alps delivering key messages and information on specific topics related to energy and valorisation of interreg projects dealing on the topic. *Financed by Alpgov2*

### **Energy efficiency in Alpine small and medium sized enterprises**

Establishing an Alpine cluster for energy efficiency in SMEs and elaborating energy auditing methodology for small enterprises. *Financed by CAESAR*

*ARPAF 2*

---

80 million people, 7 countries, 48 regions,  
mountains and plains addressing together  
common challenges and opportunities

## 3 concrete projects or initiatives which you would like will be funded in the future

- **EUSALP energy observatory: to consolidate Energy survey**
  - 3 meetings of regional observatories financed by Alpgov2
  - Project proposal ASP Alpendata rejected
  - first “brick” can be financed by a H2020 project ENERGEE-Watch (call LC-SC3-EE16-2019, Deliver large-scale and action-oriented peer-to-peer learning programmes targeting cities and/or regions, with a strong replication potential European-wide): starting mid 2020.; Peer to peer learning between regional observatories
  - Next steps: financing a web platform to collect data from 48 regions! A region through mainstream programmes?

---

80 million people, 7 countries, 48 regions,  
mountains and plains addressing together  
common challenges and opportunities

- **EUSALP energy communities:** mapping and providing insights on how to reinforce the emergence of renewable energy communities on the EUSALP territory, contributing to discover strength and weaknesses of this phenomenon and enabling future replication experiences.
    - First step: Alpgrids ASP project starting october 2019.
    - Second brick: find a budget to get a specific study on this ( ARPAF would be great!)
  - **Energy management in small alpine municipalities**
    - Better promotion of H2020 financing project development assistance ( ex: BAPAURA in AURA): 2012-2027: Horizon Europe? Life?
    - Financing “one stop shop services” to small and mid-size municipalities through mainstream programmes ( ex: Region Centre in France)
- 

80 million people, 7 countries, 48 regions,  
mountains and plains addressing together  
common challenges and opportunities
