

Programme: AT12-KWF research, development and innovation program - 2016-2020

Topic/s:

The objective of this KWF tender is to strengthen the innovative strength of Austrian companies, especially SMEs. Support is given to companies that plan and implement an R & D or innovation project with the help of an innovation assistant. They are hired by the company, work directly in the company and participate in the group qualification and training program. In particular, companies are to be approached who are planning an R & D or innovation project for the first time and who create the appropriate framework conditions for this or who face the current challenges (eg digitization | Industry 4.0). Attractive conditions are to be created for the graduates and the graduates to make a career in a Carinthian SME. Entrepreneurs have the opportunity to exchange ideas in an innovation or knowledge network. In the meantime, more than 170 innovation assistants form a cross-industry innovation network beyond Carinthia.

Beneficiaries: SME

AG1 priority fields: Advanced Manufacturing; ICT

Co-funding type:
