

Programme: AT12-KWF research, development and innovation program - 2016-2020

Topic/s:

The aim of this KWF tender is to promote innovative, technology-oriented and knowledge-based start-up projects with economic prospects for success. The start-up climate for general and part-time secondary schools, universities, non-university research institutions and the general population is to be improved.

The applicant for funding is a university, a university of applied sciences or a non-university research institution, which submit the submission to the KWF for start-ups (founders and founders) within and outside of these organizations. The persons willing to start up are then in a contractual relationship with the applicant during the project implementation period and will additionally be assisted by the build! Gründerzentrum Kärnten GmbH during your start-up project.

The focus is on the process of maturing a business idea into a complete business plan, the associated development of marketable products and services as well as the targeted preparation of a business start-up.

This KWF call for proposals will be funded by the ERDF (implementation of measure M08 »Supporting knowledge-intensive start-ups« of the ERDF program »Investing in growth and jobs 2014-2020«).
