

EUSALP Embedding Workshop

Tuesday October 25, 09.00-12.30

The process of **embedding** aims at **facilitating the connection between EUSALP activities and available funding opportunities** by enhancing **dialogue & exchange of information** between Action Groups members and bodies in charge of managing funding opportunities and in particular managing authorities and intermediary bodies.

The **EUSALP Embedding Workshop**, organised by the 2022 EUSALP Italian Presidency, aims to facilitate the transition to the second phase of the embedding process by providing a concrete working session showcasing instruments & best practices which could be utilised by the bodies in charge of managing the funds in order to mainstream and implement **common priorities, objectives and strategic projects** for the Alpine Region within the national and regional programmes and direct EU funds.

Register here: [link](#)
