

Programme: AT12-KWF research, development and innovation program - 2016-2020

Topic/s:

The invitation to tender » TD | ICT - Technological Services and ICT Carinthia « supports Carinthian SMEs in the secondary and tertiary sector in the implementation of innovative project projects. The submitted projects will lead to novel innovative solutions in the field of information and communication technologies (ICT), technology-oriented product and process innovations as well as knowledge-based technological services. The objectives are new or significantly improved marketable products, processes or services and thus an improved competitive position for the participating companies.

The projects are to be carried out in cooperation with a scientific institution (university, non-university), but can also be carried out through in-house development work. Other cooperation partners (SMEs , large companies, schools) can be used to handle project-related subareas.

Projects in the TD | ICT Call are awarded annually. Find out more at www.kwf.at/tdikt-preistraeger
