## 5th Meeting EUSALP Action Group 9

To make the territory a model region for energy efficiency and renewable energy

**Bozen/Bolzano, 21.03.2018**

Ulrich Santa, EUSALP Action Group 9 coordinator / Director Agency for Energy South Tyrol – CasaClima

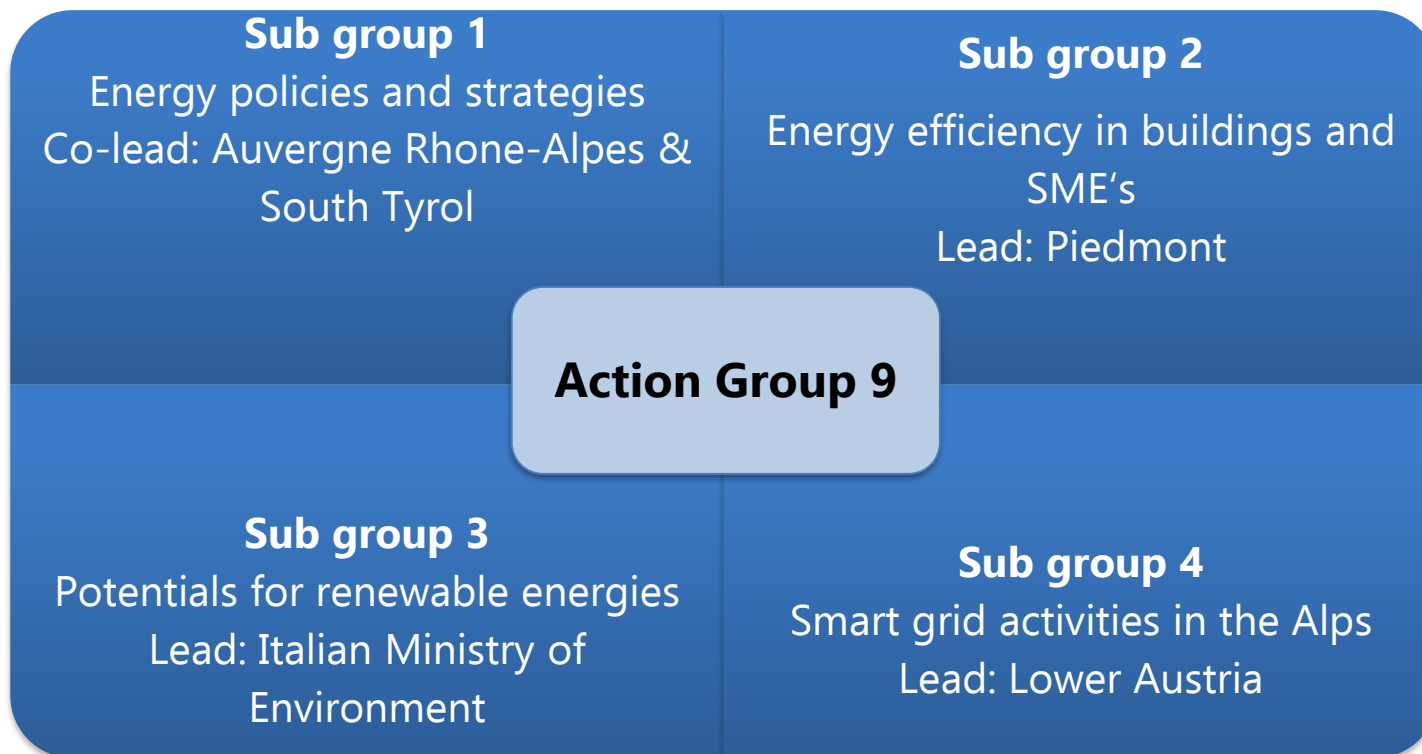

80 million people, 7 countries, 48 regions,  
mountains and plains addressing together  
common challenges and opportunities

This project is co-financed by the European Union via Interreg Alpine Space

## Architecture of Action Group 9

80 million people, 7 countries, 48 regions,  
mountains and plains addressing together  
common challenges and opportunities

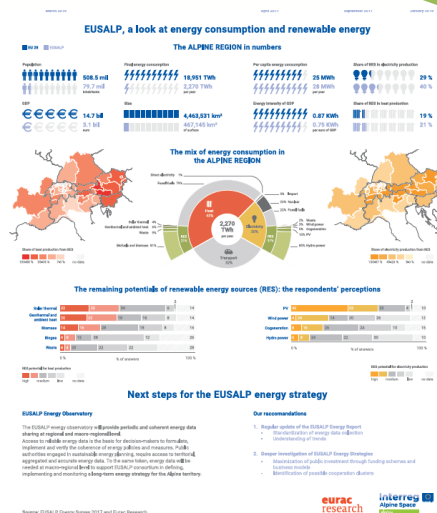

## Activities Action Group 9 - October 2017 – March 2018 Sub group 1 „Energy strategies“

Publication of  
EUSALP Energy  
Survey 2017

„to develop a  
EUSALP  
energy  
platform“

„to develop a EUSALP  
energy observatory“

Organization of 1st Experts  
Workshop 2018,  
20.03.2018

80 million people, 7 countries, 48 regions,  
mountains and plains addressing together  
common challenges and opportunities

common challenges and opportunities

## Stock taking 2017: Activities Action Group 9 Sub group 3 „Renewable Energies“

JRC „Science for  
Policy paper“  
„Sustainable growth  
of bioenergy in  
EUSAIR and EUSALP“

„to define the remaining  
potentials of RES in the  
Alpine area“

Collection of current  
research projects

80 million people, 7 countries, 48 regions,  
mountains and plains addressing together  
common challenges and opportunities

## Activities Action Group 9 - October 2017 – March 2018

### Sub group 4 „Smart grids“

1st EUSALP Annual Forum

November 23-24. November 2018

Organization of Workshop SMART VILLAGES „A gearwheel to innovation, development, sustainability, and job opportunities“

AG3 – AG5 – AG9

Representation of Action Group 9 at the Citizens Forum

Alpine Space Project presentation

Smart Villages

January 2018

eNU as project partner

CasaClima as observer

2019

Lombardy

2020

France

## Tyrolean presidency supports EUSLP Action Group 9

### **Establishment of a macro-regional energy observatory**

With its specific geographical and structural characteristics, the Alpine Region has diverse potential for becoming a model region for energy efficiency and renewable energy. In that context, reliable energy data are an important basis for decision-makers to formulate, implement and verify the effectiveness of energy policies and measures. At the macro-regional level, too, energy data can help to implement and monitor a long-term cross-border energy strategy for the Alpine Region. This is where the EUSALP Energy Observatory is relevant. With the help of the observatory, actual energy production and consumption in the Alpine Region will be mapped and macro-regional developments and trends identified. It will also be a help for those Regions in the Alpine Region that are not currently collecting and evaluating local energy data themselves. Implementation of the observatory project requires networking a series of actors as well as collecting and standardising the relevant data.

As a first step, the Tyrolean EUSALP presidency will support the establishment of a competence network in 2018. On the basis of existing regional cooperation agreements and observatories in the Alpine Region, a competence network will be developed to elaborate the framework conditions, prerequisites and fields of action for the EUSALP Energy Observatory in a series of workshops in 2018.

### **Development of a concept for an annual EUSALP Energy Conference**

Creating the right framework conditions for effective cooperation is one of the most complex tasks of the established EU Strategy for the Alpine Region. Of particular importance in this context is the involvement of all actors and stakeholders, as well as the need to ensure political leadership and strengthen cooperation between the different levels of governance. One important task, which the Tyrol will be working on in cooperation with Action Group 9, is the further development of a regular EUSALP Energy Conference as a visible platform for political decision-makers, experts, authorities and civil society. Under the auspices of the Tyrolean presidency, Action Group 9 will organise the 2<sup>nd</sup> EUSALP Energy Conference to be held in June 2018. It will be an awareness-building platform at the regional, national and European levels for discussion and formulation of the challenges confronting the EUSALP in terms of energy policy.

# Meeting agenda

## **SESSION 1 – plenary session, floor 3, seminar area B**

09.00	Arrival of participants
09.15-09.30	Welcoming of participants – adoption of agenda <i>Ulrich Santa, Agency for Energy South Tyrol – CasaClima</i>
09.30-10.00	Bioenergy potentials in the MRS EUSALP <i>Marilena Muntean, European Commission, Directorate for Energy, Transport and Climate</i>
10.00-10.30	Wood burning impact on air quality in Lombardy: analysis and perspectives <i>Guido Lanzani, Head of Air Quality Unit Environmental Monitoring Area Arpa Lombardia</i>
10.30-10.50	Coffee break
10.50-11.20	Economy and energy <i>Alfred Aberer, General secretary of the Chamber of Commerce South Tyrol / Eurochamber</i>
11.20-11.50	eMOTICON - Strategic Actions in e-Mobility for Public Authorities <i>Cristina Cavicchioli, Ricerca sul Sistema Energetico RSE Spa</i>
11.50-12.05	Hydrogen as change agent towards a low carbon society <i>Etienne Vienot, Auvergne-Rhône-Alpes Énergie Environnement</i>
12.05-12.30	Organization of the 2 <sup>nd</sup> EUSALP Energy Conference <i>Maren Meyer</i>
12.30-13.30	Lunch break

80 million people, 7 countries, 48 regions,  
 mountains and plains addressing together  
 common challenges and opportunities

# Meeting agenda

## SESSION 2 – parallel sessions of subgroups

13.30-15.00	<b>Subgroup 2 “Energy Efficiency in buildings and in enterprises”</b> <b>Floor 1, A.1.104</b>
13.30-14.00	CESBA Report on common Key Performance Indicators <i>Etienne Vienot, Auvergne-Rhône-Alpes Énergie Environnement</i>
14.00-14.30	Energy efficiency network for SME, <i>Ulrich Santa, Agency for Energy South Tyrol – CasaClima</i>
14.30-15.00	Revision of activities subgroup 2 according to work plan
13.30-15.00	<b>Subgroup 3 “Renewable Energy” and subgroup 4 “Smart Grids”</b> <b>Floor 3, seminar area B</b>
13.30-14.00	Demand Side Management and Renewable Energies, <i>Tino Blondiau, Energy and Environment Agency Niederösterreich</i>
14.00-14.30	Joint activities in the field of hydrogen <i>Etienne Vienot, Auvergne-Rhône-Alpes Énergie Environnement</i>
14.30-15.00	Revision of activities according to work plan

80 million people, 7 countries, 48 regions,  
 mountains and plains addressing together  
 common challenges and opportunities

# Meeting agenda

## **SESSION 3 – plenary session, floor 3, seminar area B**

15.00-15.20	Coffee break
15.20-15.45	Reporting of subgroups in the plenary about work plan revisions
15.45-16.45	Commission Report on implementation process of the MRS EUSALP – Feedback by EUSALP AG9
16.45-17.30	Wrap up of the meeting / AOB
