

European Energy Award in Tyrol

Experiences made

DI Bruno Oberhuber

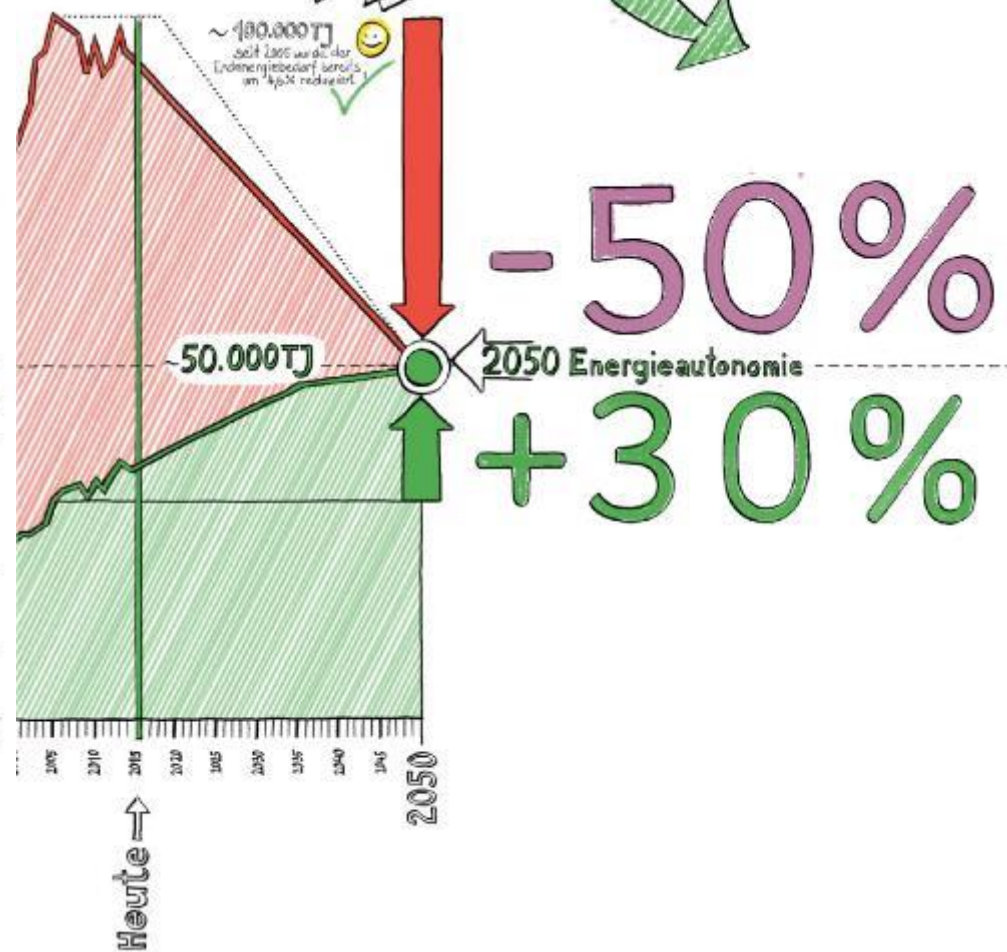

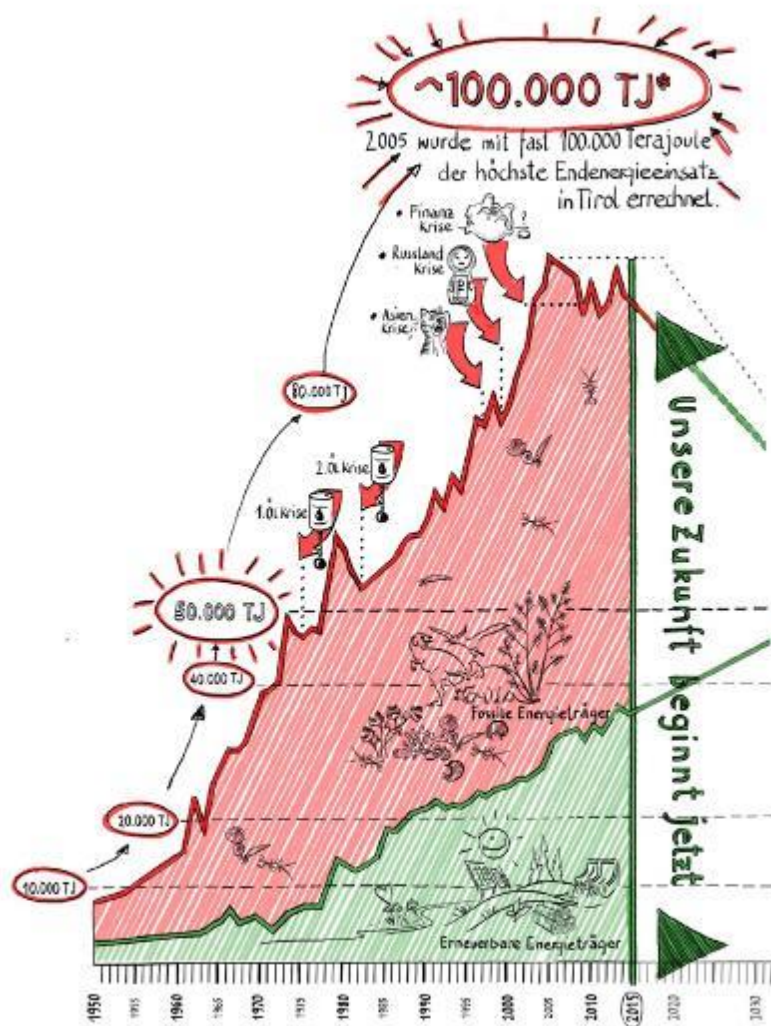

Energie Tirol. The independent energy consultancy.

We are the **independent energy consultancy** of the Land Tyrol and **competent advisor** for all energy related questions. No matter if **private citizen, community or company** – when it comes to **energy**, Energie Tirol is your reliable source of information.

Our committed Team finds the right answers to your questions.

The vision

TIROL
2050
energieautonom

The e5-programme

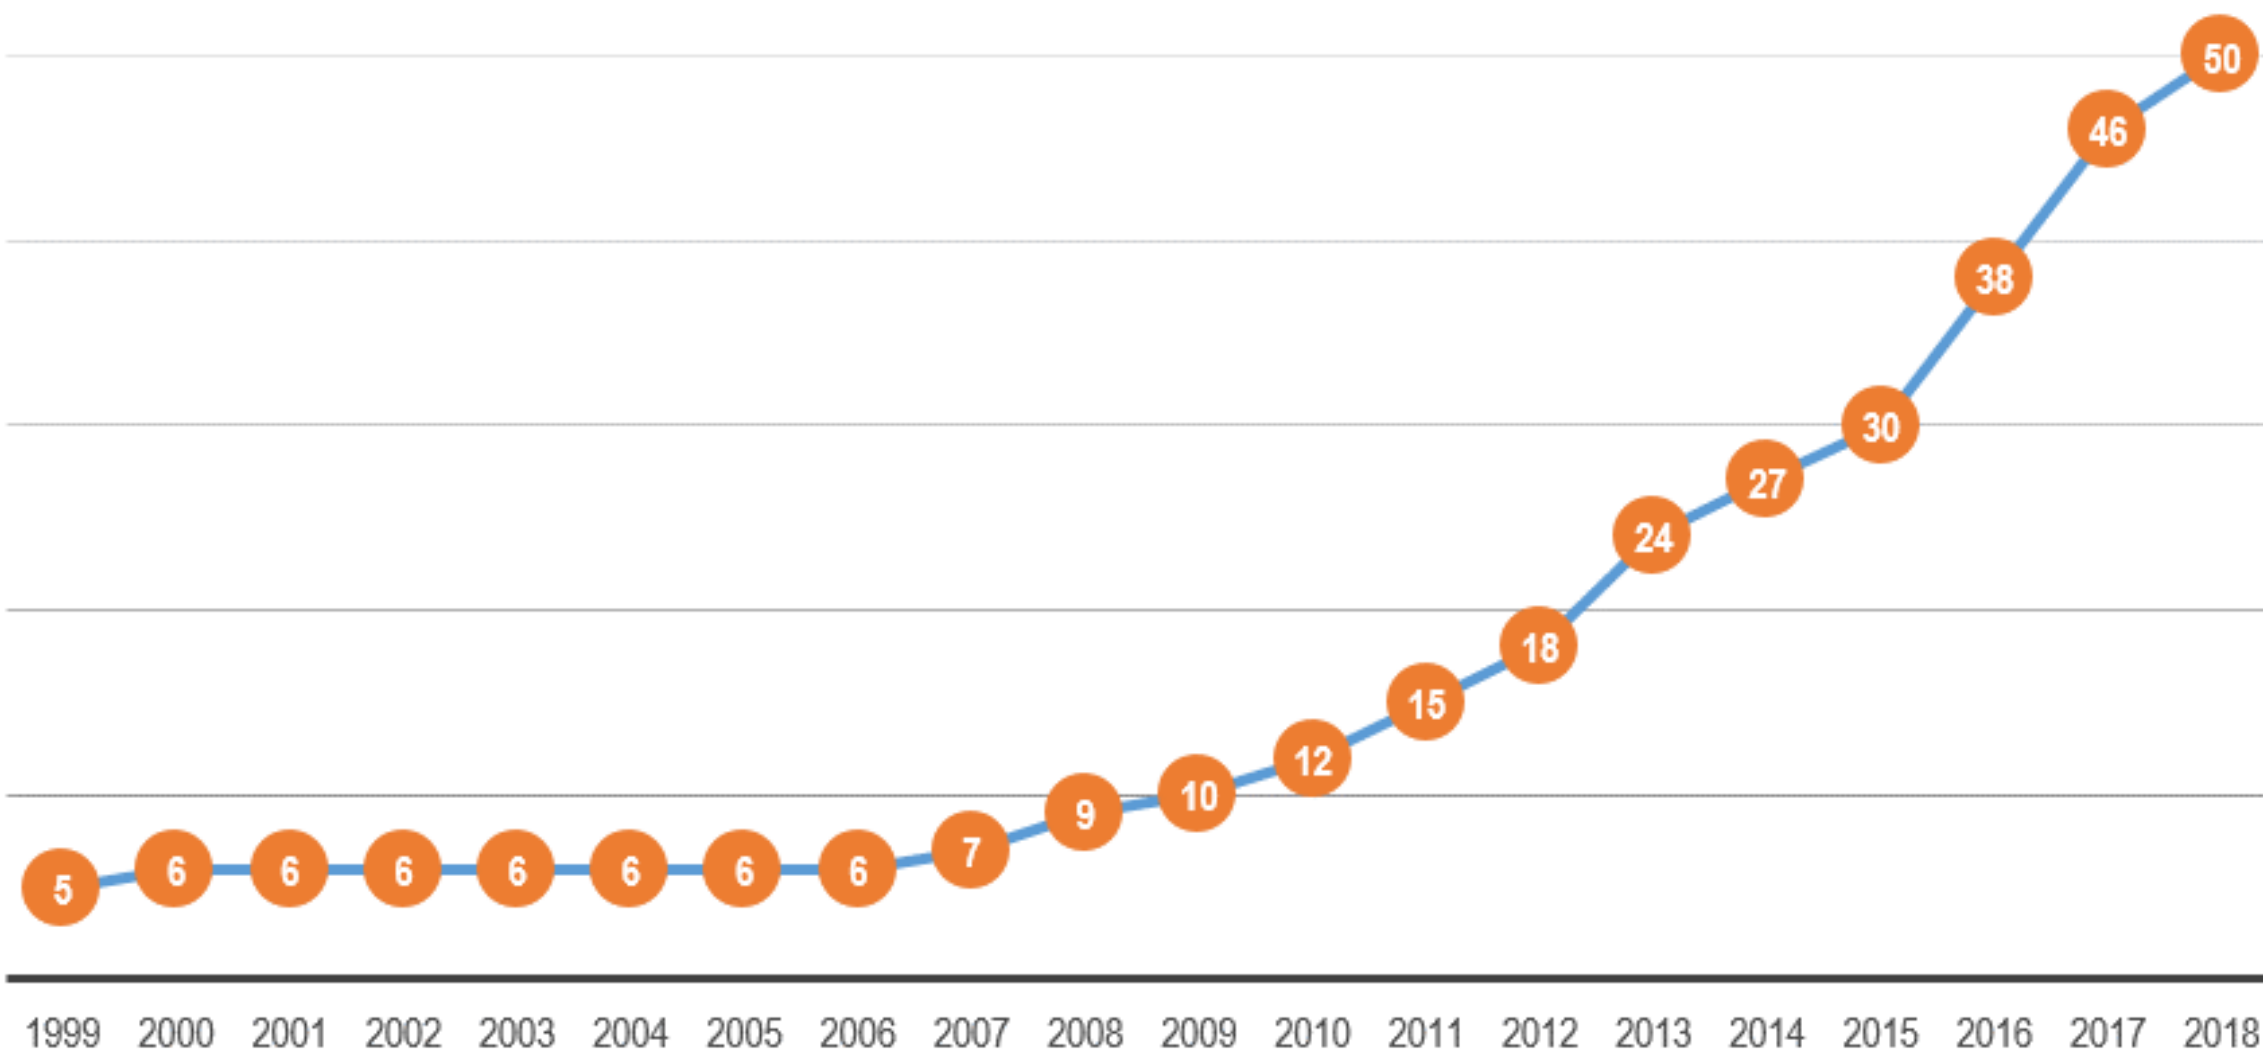

20 years of e5

A story of success

- > Developed in 1998 in Vorarlberg, Tyrol and Salzburg
- > Further developed in 2002 together with Germany, Switzerland and Poland and formed into the European Energy Award
- > In Austria: 7 provinces, over 217 cities and communities, 4 provincial capitals

Number of e5-communities in Tyrol

First steps

Council resolution

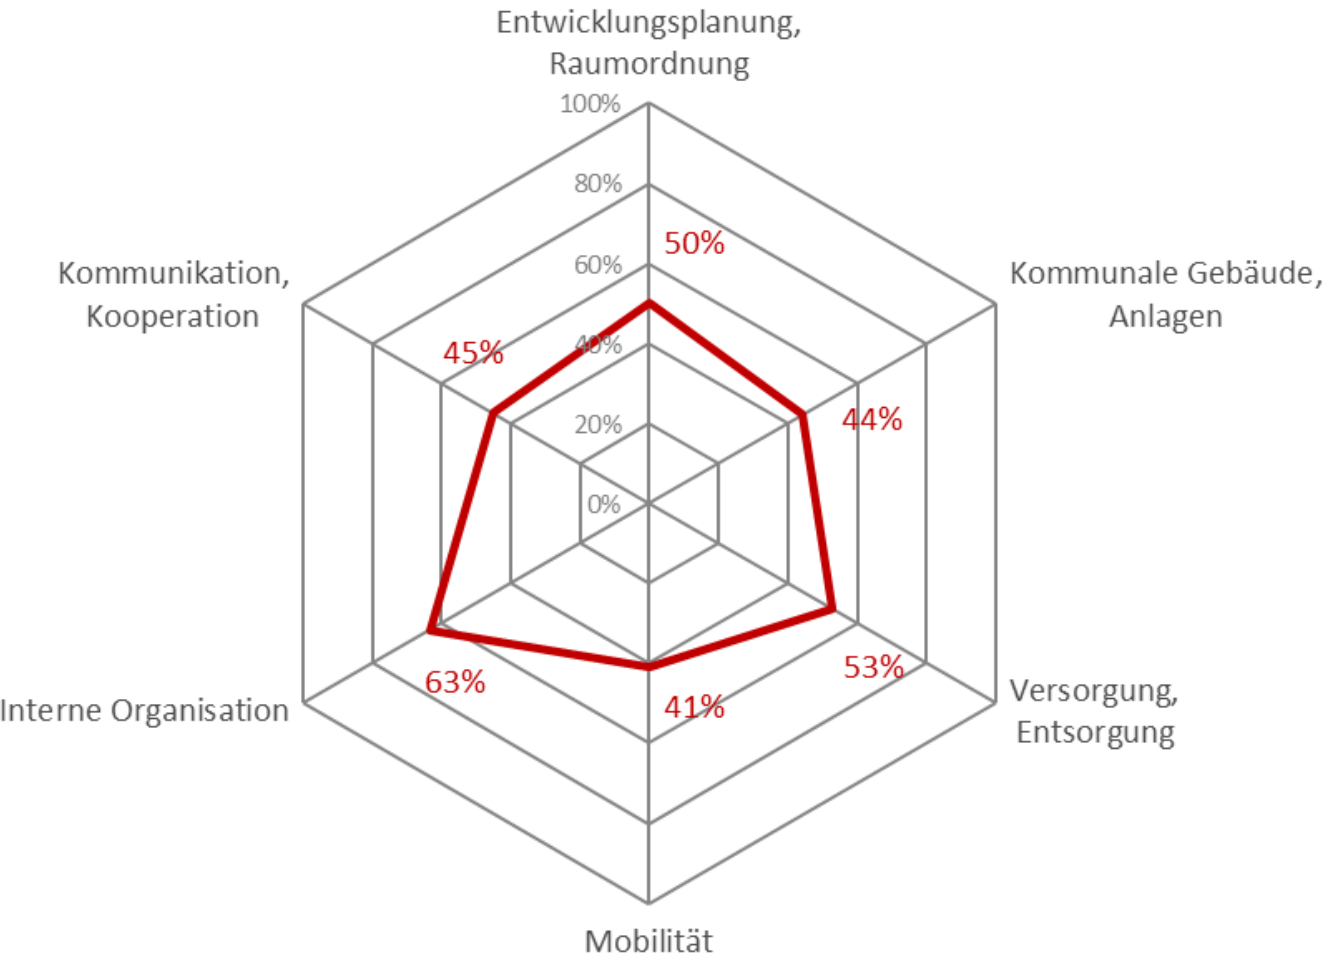

Forming of the energy team

Allocation of a e5-supervisor

The process

Situation Analysis

- > Assessment of already implemented energy- and climate protection measures
- > Valuation with the help of a standardized catalogue
- > Current status and future possibilities for the municipality

Result: Strengths and potentials – profile of the community

Work programme

- > Basic-profile of the community – Establishment of an individual work programme
- > Activities, measures
- > Responsibilities, competences
- > Time frames, priorities and budget planning

**Result: Work programme –
Who does what until when**

Implementation of projects

- > Energy team, municipal council, committees, e5-supervisor
- > Implementation of planned projects
- > Support through the network of e5-communities

Audit and award giving

- > Periodic audit, if the planned measures have been implemented
- > Audit at intervals of 3-4 years
- > With the help of a standardized catalogue
- > Award giving and acknowledgment of the work accomplished

AREAS OF ACTIVITY

Regional development

Municipal buildings

Supply and waste management

Mobility

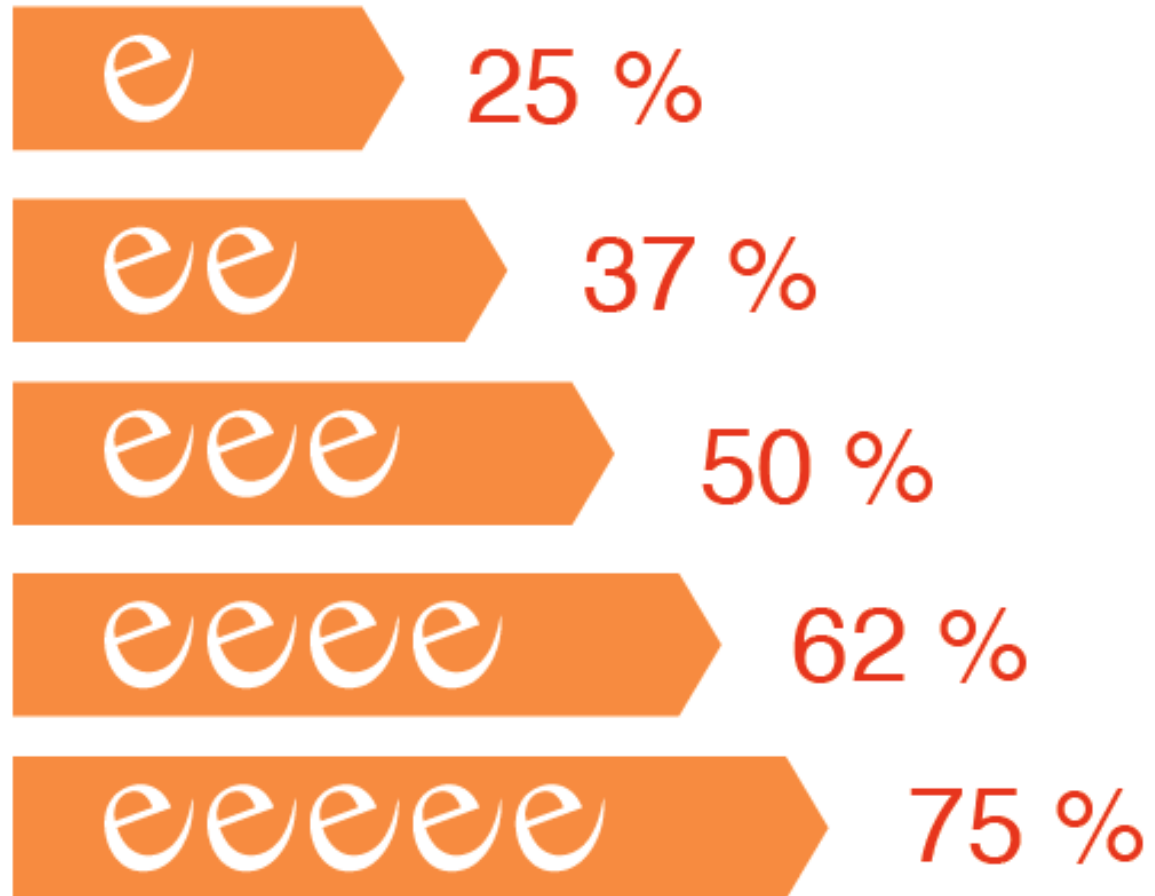

Internal organisation

Communication and cooperation

Areas of activity

- > 6 areas of activity
- > 76 measures
- > Between 7 and 18 measures for each area of activity

e5-Valuation

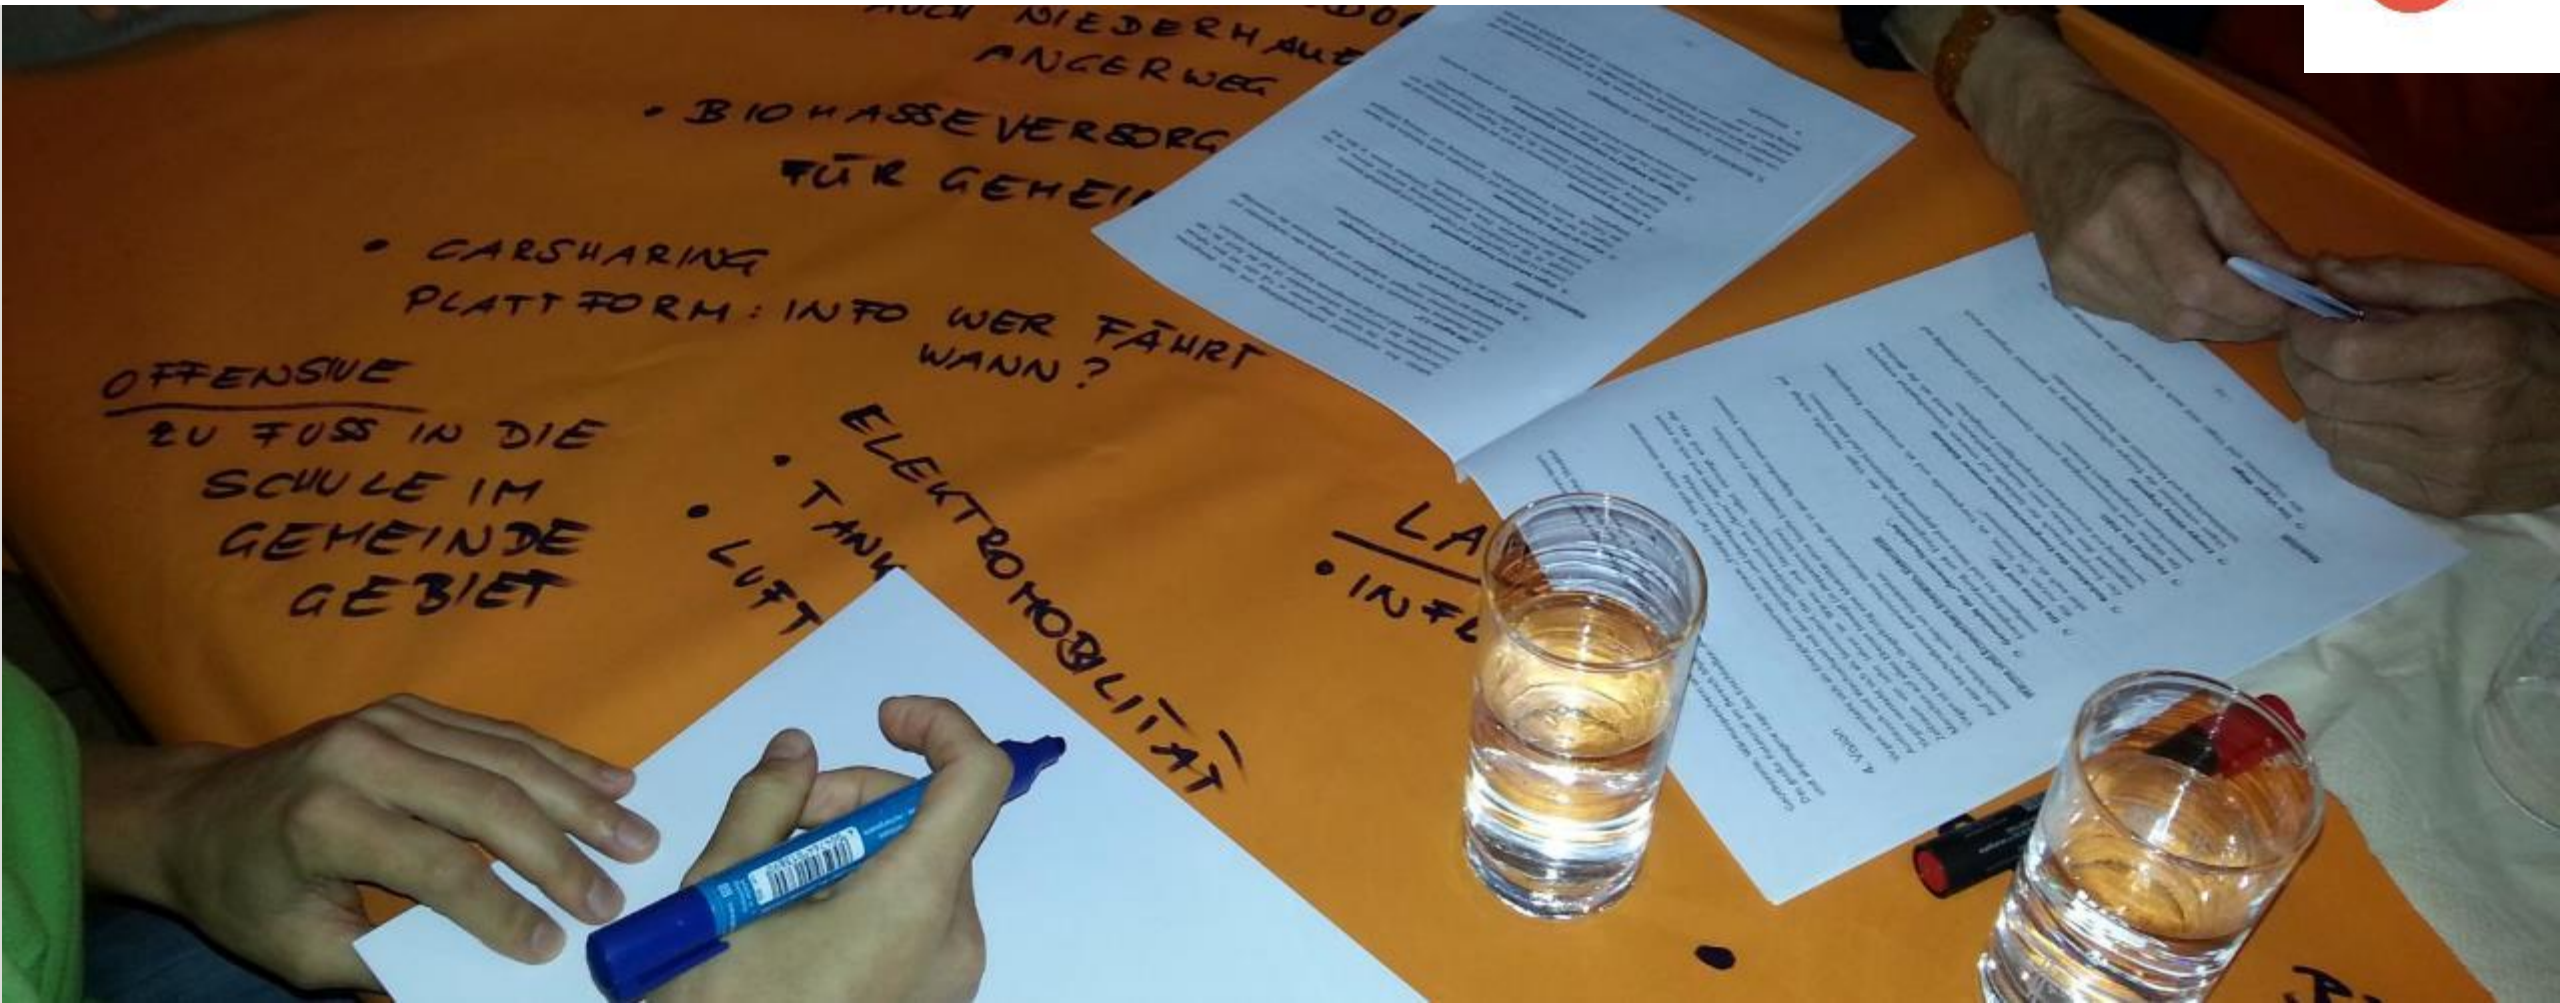

- > 500 maximal points
- > Each municipality is measured in relation to its possibilities
- > Each measures is worth between 2 and 12 points
- > From this results the degree of implementation and number of e's

Implemented measures

Energy Mission Statement

Set goals and implement them

Municipal buildings of highest quality

New construction and refurbishment

Thermal energy from renewables

Clean and regional

Electricity from sun power

Without emissions

„Encounter zones“

Space for everyone

Promotion of bicycle traffic

Active Mobility

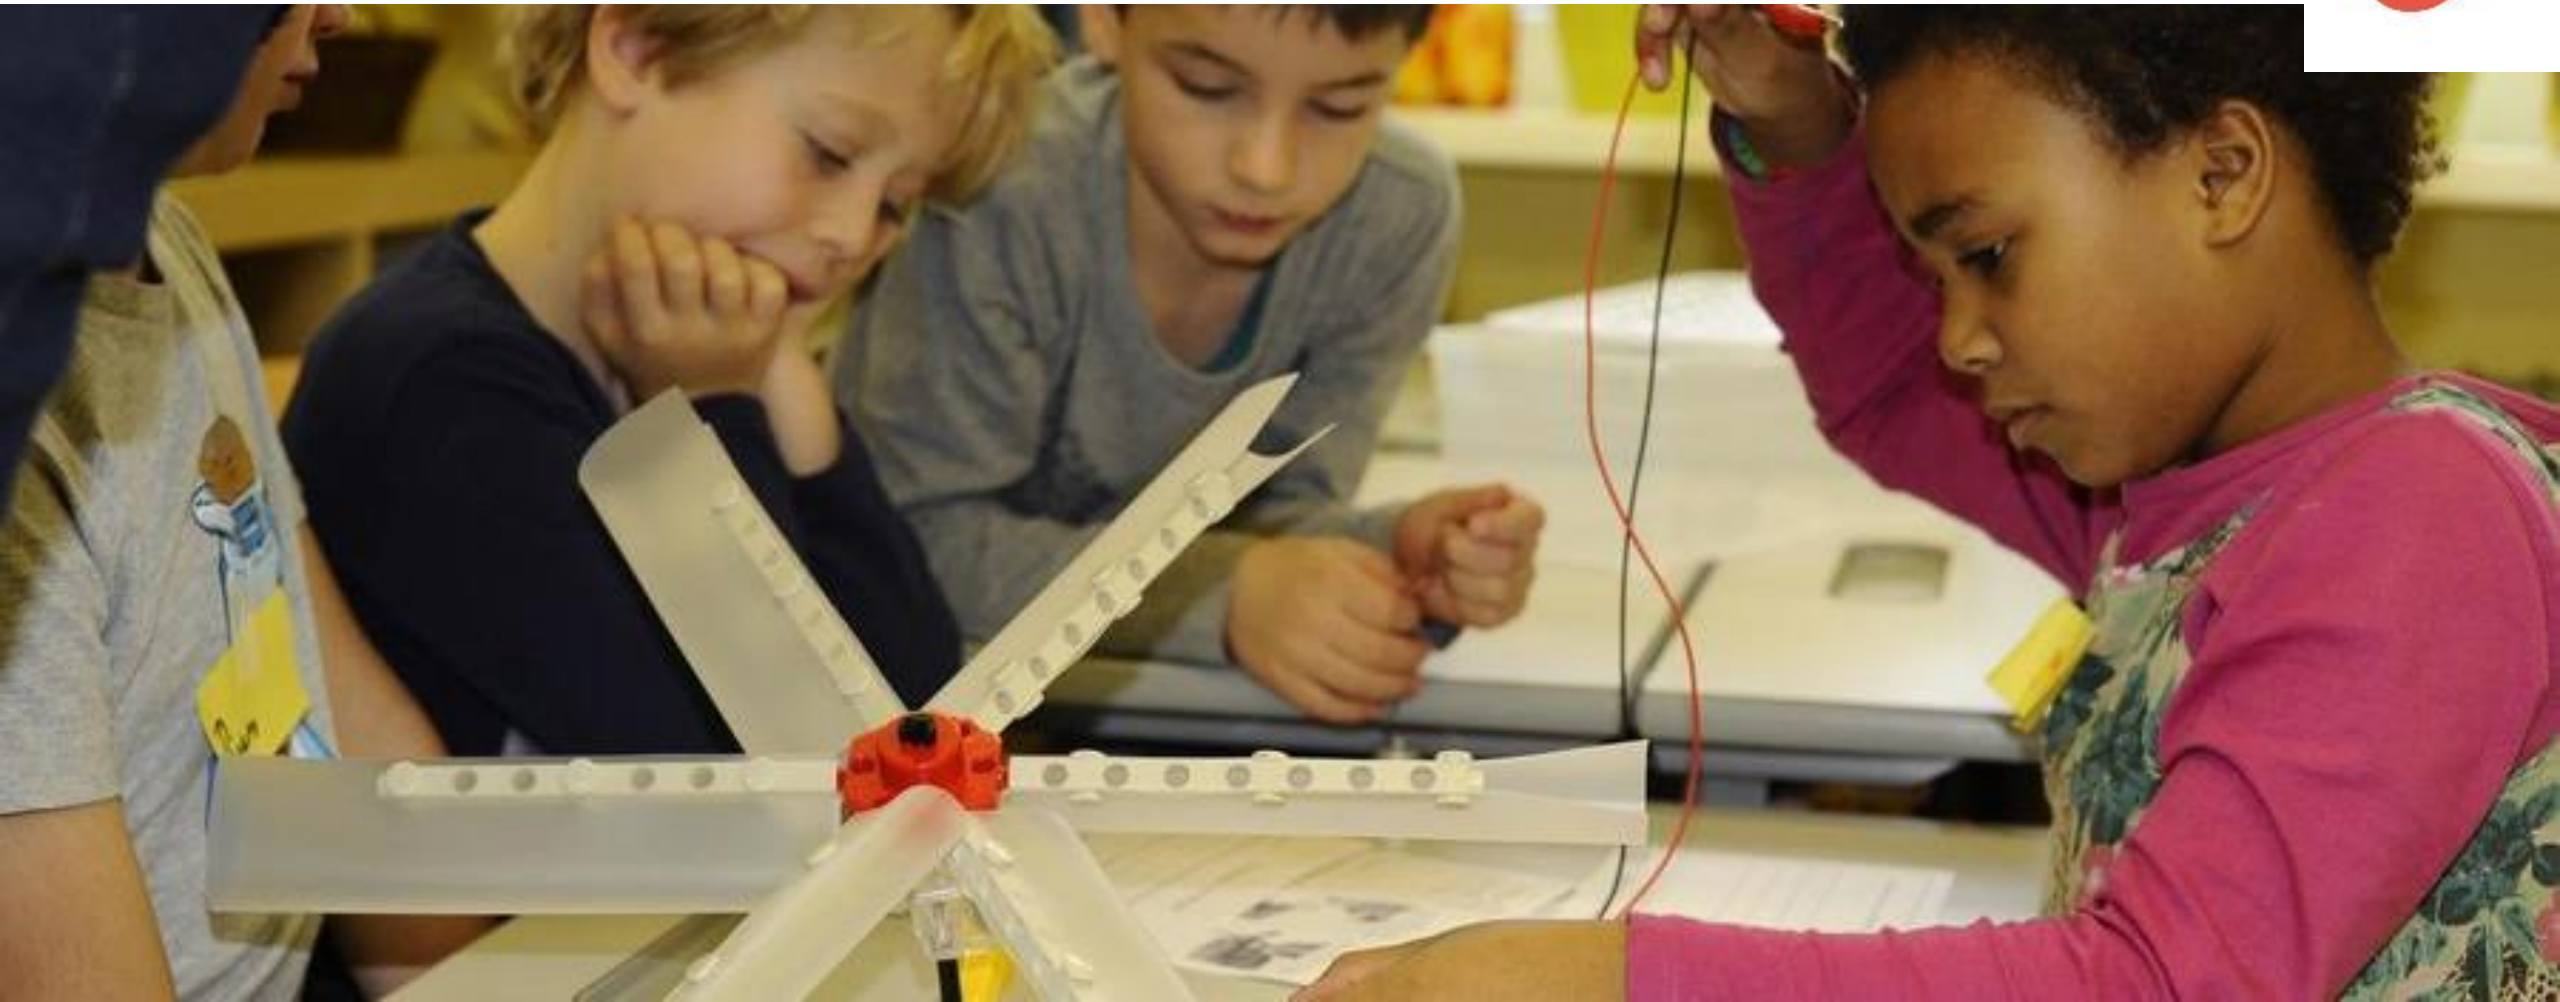

e5-Field trips

Learning from others, broaden our horizons

Workshops in schools

Responsible use of energy and resources

Solar day

Awareness raising for renewable energies

The e5-Team of Energie Tirol

Supporting the municipalities

Thank you
for your attention.
